

Envision...

leading the evolution of sustainable infrastructure

Justin Waples, PE, ENV SP, PMP
jwaples@centralsan.org

Presentation Overview

1. What is Envision
2. Example Projects
3. Sustainability & Resiliency
4. Envision Framework
5. Why use Envision

Envision is a Joint Collaboration

ISI Founding Organizations

Envision: Infrastructure Applications

ENERGY

Geothermal
Hydroelectric
Nuclear
Coal
Natural Gas
Oil/Refinery
Wind
Solar
Biomass

WATER

Water Resource
Recovery Facilities
Storm Water
Management
Flood Control
Water Reuse
Potable Water
Distribution

WASTE

Solid waste
Recycling
Hazardous
Waste
Collection &
Transfer

TRANSPORT

Airports
Roads
Highways
Bikes
Pedestrians
Railways
Public Transit
Ports
Waterways

LANDSCAPE

Public Realm
Parks
Ecosystem
Services
Natural
Infrastructure

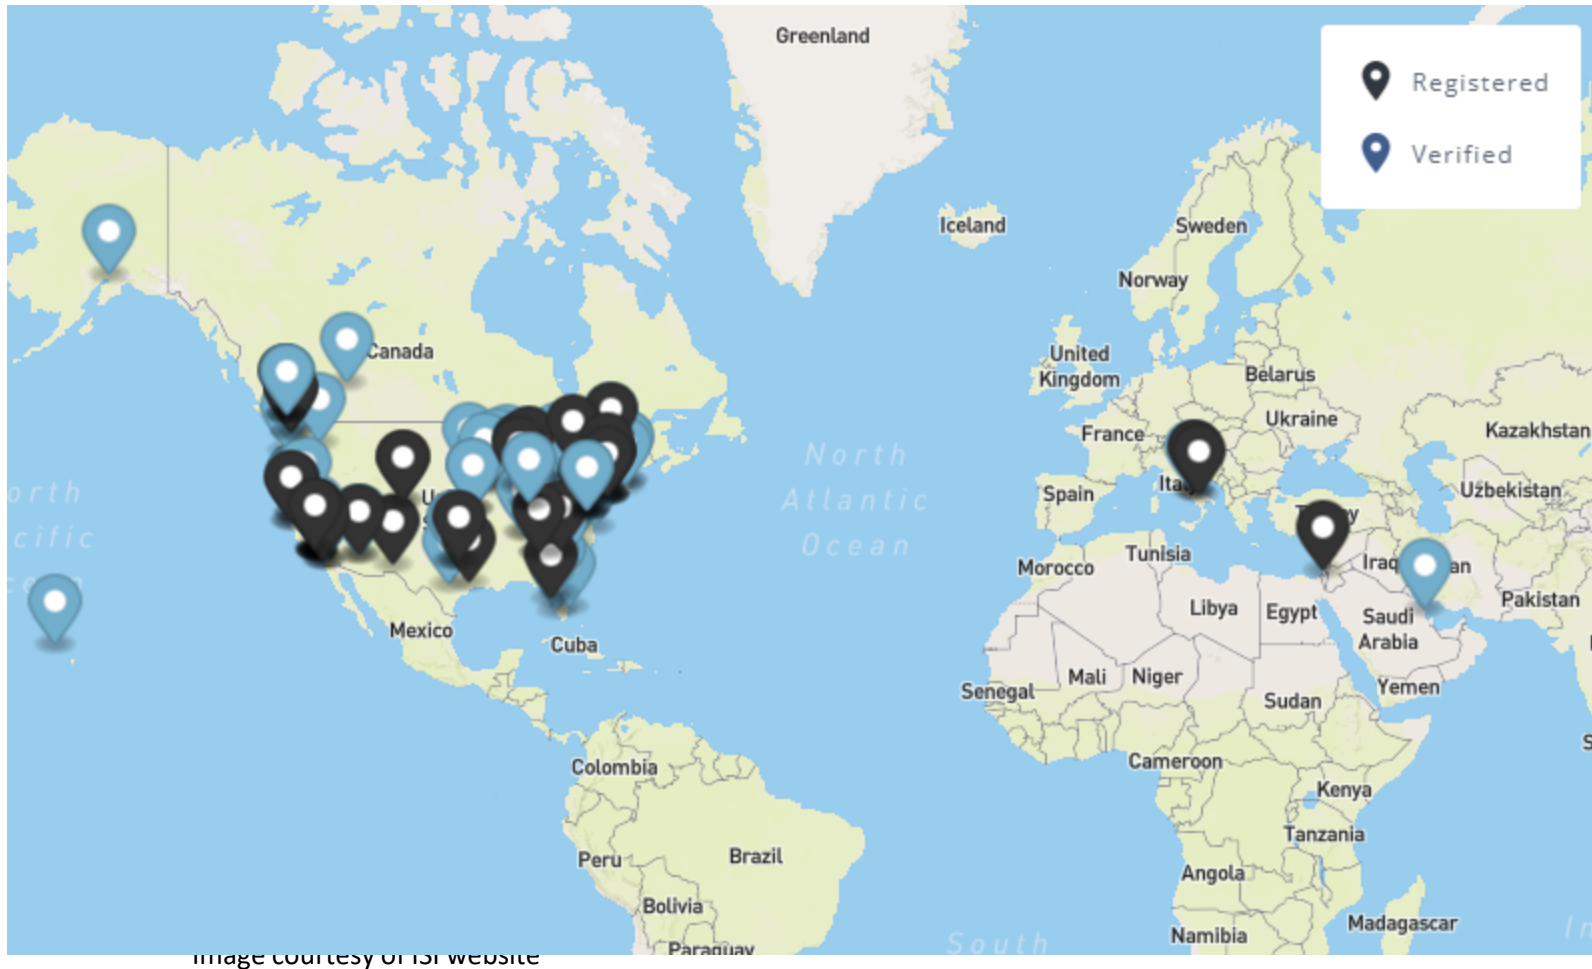

INFORMATION

Telecommunications
Internet
Phones
Data Centers
Sensors

Cumulative Value of Envision Verified Projects

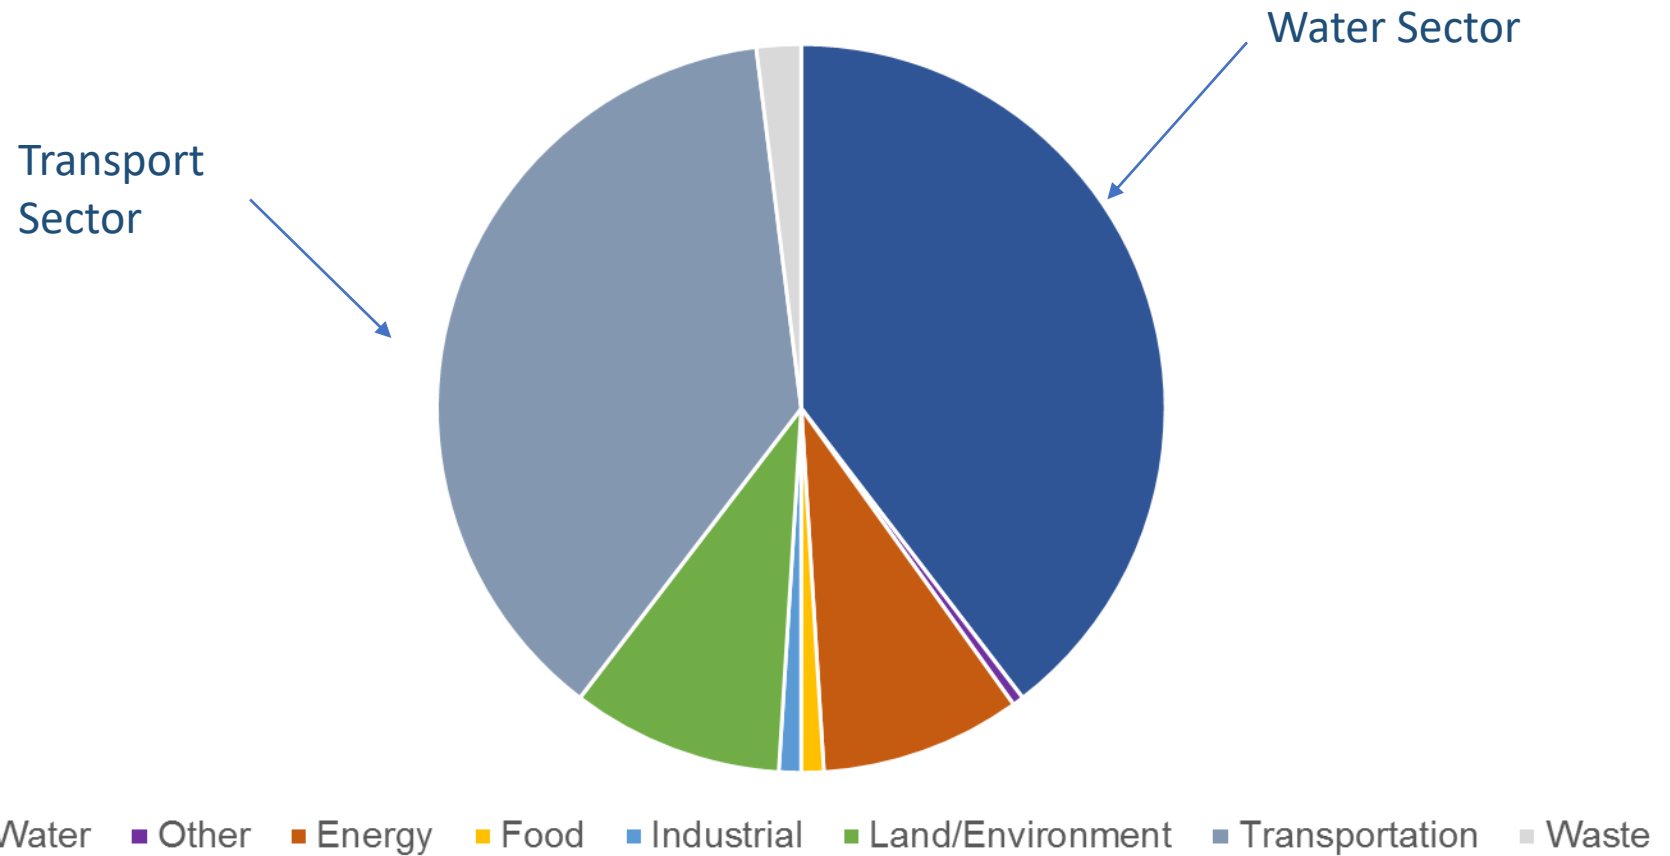

Envision Project Locations

Projects Presently in Verification (Top 10 Only)

Envision Projects By Sector

Nutrient Management Facility

Treatment plant

Virginia, USA

Envision Platinum, 2016

San Diego International Airport

Green Build Project

California, USA

Envision Platinum 2016

Kunia County Farms

Aquaponics Farm

Hawaii, USA

Envision Gold, 2016

Integrated Pipeline Project

Tarrant Regional Water District

Texas, USA

Envision Platinum 2016

“Sustainable development is...

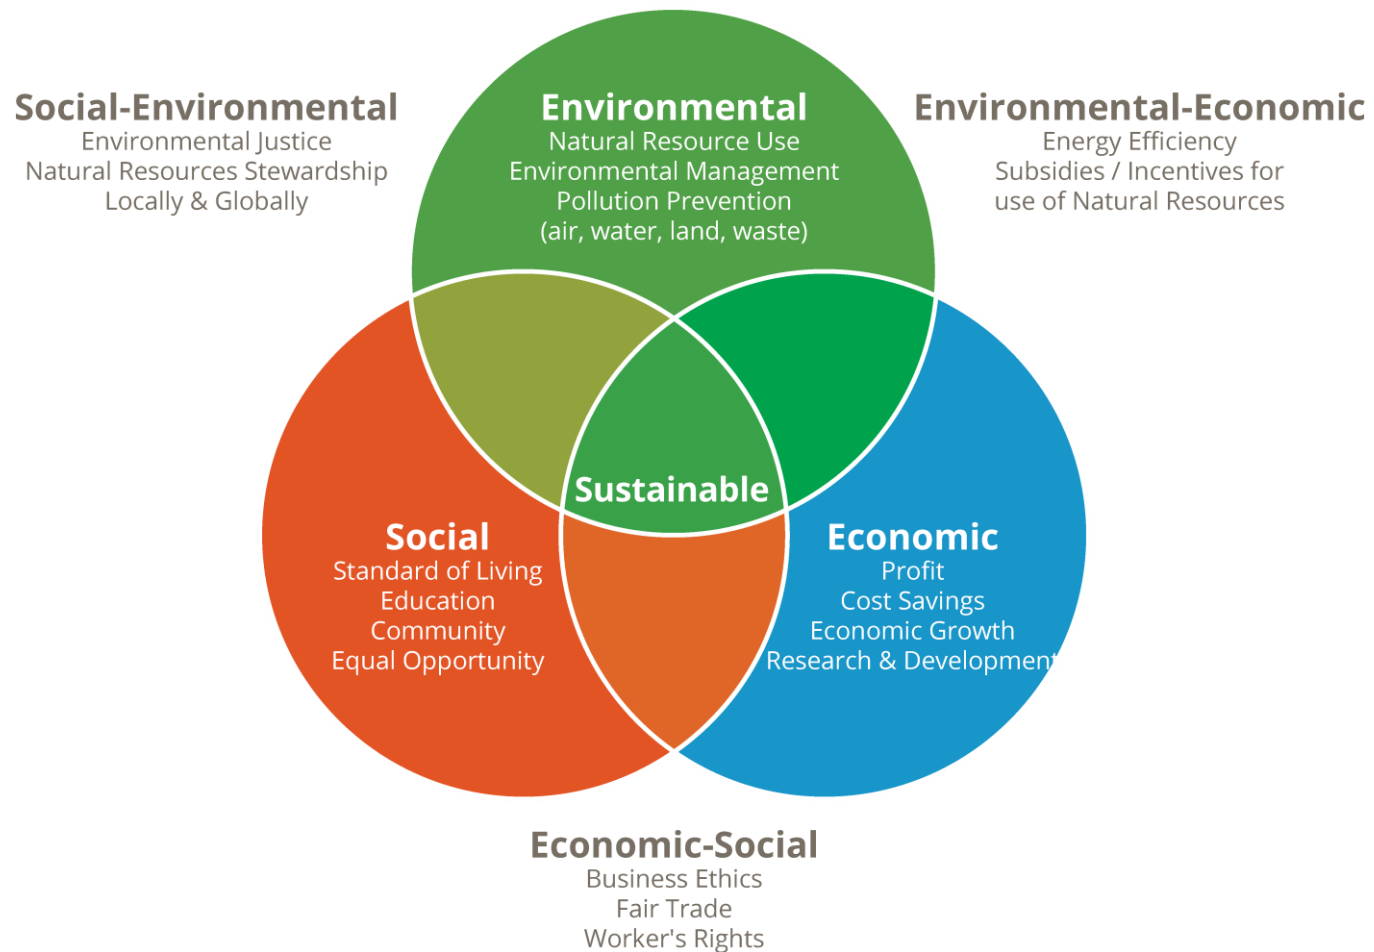

...development that meets the needs of the present without compromising the ability of future generations to meet their own needs.”

-Brundtland Commission Report 1987

“Resilience is...

**...the ability of a system, community or society exposed
to hazards, to resist, absorb, accommodate and to
recover...in a timely and efficient manner...”**

Sustainability

Development vs. Resources

Source: Living Planet Report (2006), World Wildlife Fund

Development vs. Resources

Changing Environment

- What is the new “normal”?
- What are the possible extremes?
- Are there any new variables?

Infrastructure's Role: Long-term

Highways
20-50 years

Bridges
30-75 years

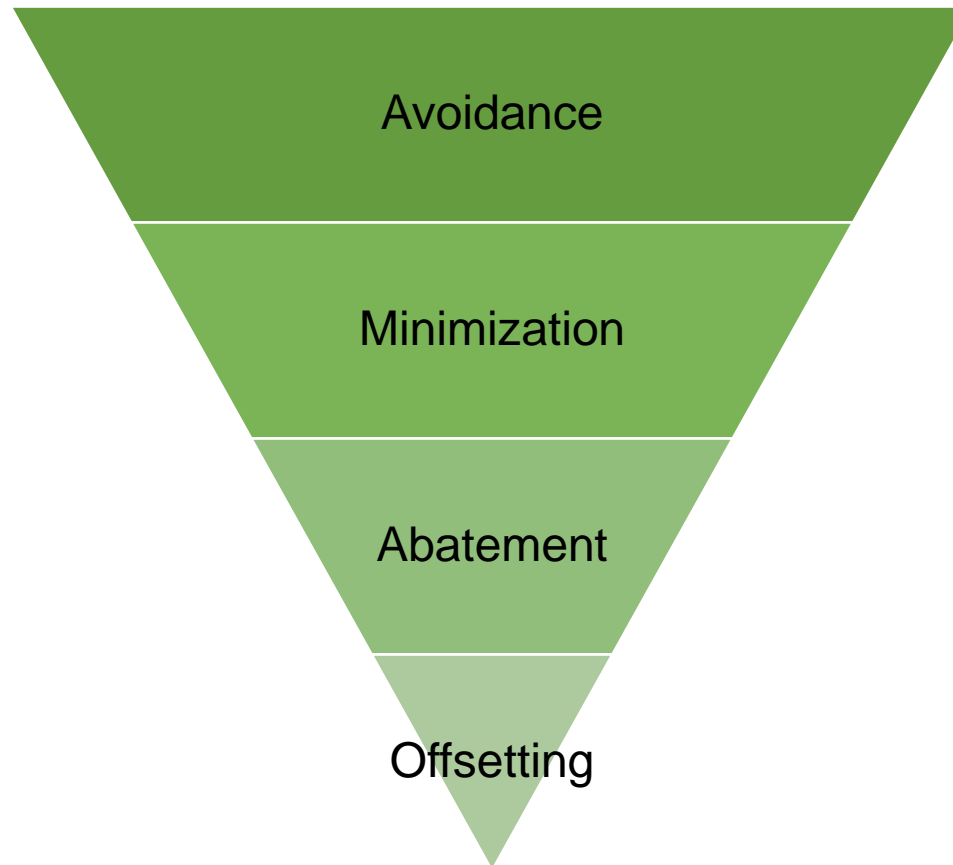

Pipelines
50-100 years

Dams
50-100 years

Mitigation Hierarchy

Re-Thinking the Economic Model

Image courtesy of Financial Times

Expanding Opportunities for Performance Improvement

Project Phases

More durability and flexibility

End of life disassembly, up-cycling

Stakeholder Collaboration

Project team collaboration

Stakeholder issues and concerns

Performance Achievement

Beyond sustainable equilibrium

Restoration of systems

Envision Award Levels

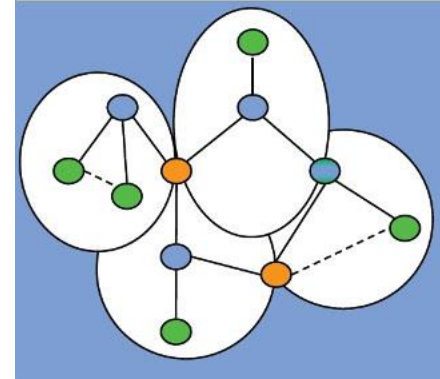

Making the Most of Opportunities

Advancing Sustainability Knowledge and Education

- Captures, retains, and disseminates knowledge
- Creates a new breed of sustainability engineer/practitioner

Envision – Credits in 5 Categories

Quality of Life

Leadership

Resource Allocation

Natural World

Climate & Resilience

Quality of Life

Wellbeing

Mobility

Community

Leadership

Collaboration

Planning

Economy

Resource Allocation

Materials

Energy

Water

Natural World

Siting
Conservation
Ecology

Risk and Resilience

Emissions

Resilience

The Envision Framework

1. Envision Guidance Manual
2. Envision Pre-Assessment Checklist
3. Envision Online Scoresheet
4. Envision Sustainability Professional Credential
5. Envision Verification
6. Envision Awards

Verification – Envision v3

New Verification Path

Envision v3 will require a post-construction review. Projects may choose one of two verification pathways.

Pathway A: Design + Post-Construction

Pathway B: Post-Construction

Why Envision?

1. Quantify sustainable practices with standardized, nationally recognized metrics
2. Incorporate sustainability and resiliency philosophies into infrastructure projects
3. Quantify soft benefits of sustainable and resilient infrastructure
4. Strengthen interagency and regional cooperation
5. Improve infrastructure integration
